**CORPORATE & COMMERCIAL
UNOCCUPIED PROPERTY**

CASE STUDY
**TRESPASS INCIDENT
RESPONSE**
DERBYSHIRE

THE LOCATION:

Large vacant commercial mill over 150,000sq ft located in the heart of Derbyshire.

FRG PRODUCTS & SERVICES USED

- FRG Detect temporary monitored visual alarm system
- Remote monitoring from FRG Central Control room

CLIENT
Property Management Company

THE BACKGROUND

Historically the vast size of the vacant mill had caused security issues plus peregrine falcons were nesting on site. Peregrine falcons are protected under the Wildlife and Countryside Act 1981 making it illegal to interfere with the birds or their nests.

FRG conducted a full site risk survey and identified vulnerable areas of the building.

FRG Detect temporary monitored visual alarm cameras were installed around the mill covering access points and securing all weak areas. The cost-effective wireless system is equipped with night vision and remotely monitored 24/7 from the FRG Central Control room.

THE SITUATION:

During the night, the FRG Detect security system detected trespassers on site and alerted the FRG Central Control room who immediately made a warning announcement via the system loud speaker.

Upon hearing that their intrusion had been caught on camera the trespassers fled.

Later the same night, the security system activated again showing the same two people trespassing. The FRG Central Control room alerted the police and dispatched a mobile response unit to site.

On arrival the police apprehended the two trespassers. The FRG mobile response unit identified minor damage which was reported to the client for repair.

THE RESULTS:

FRG's innovative technology and quick response led to 2 arrests and damage to the property was minimised.

It is believed the trespassers were attempting to steal baby peregrine falcons from the nests on site.
